Cybersecurity | Linux | Infrastructure Security

Summary

Cybersecurity enthusiast focused on Linux, networking, automation, and web security. Hands-on with Bash, Python, TCP/IP analysis, reconnaissance, vulnerability assessment, and offensive security labs. Ranked CTF competitor with practical exposure to infrastructure security, monitoring, and cloud workflows.

Technical Skills

Cybersecurity	Penetration Testing, Vulnerability Assessment, Web Security, Network Security, SIEM Fundamentals, Incident Response, Cryptography Basics
Linux & Networking	Linux CLI, Bash Scripting, Process Management, TCP/IP, DNS, HTTP/HTTPS, Subnetting, Firewalls
Tools	Git, GitHub, Wireshark, Nmap, Burp Suite, Metasploit, sqlmap, Python

Projects

Alien Invasion Game | Python, PyGame, OOP GitHub

- Engineered a 2D arcade game with event-driven controls, collision detection, scoring, and reusable OOP components.
- Strengthened debugging and modular design through structured game loops, state updates, and component separation.

en-de-crypt: Caesar Cipher Simulator | Python, Cryptography GitHub

- Built an encryption/decryption simulator demonstrating classical cryptography, secure communication basics, and cipher weaknesses.
- Modeled attacker interception and brute-force reasoning to connect cryptography with practical security analysis.

Practical Security Experience

- Solved CTF and TryHackMe lab challenges covering reconnaissance, enumeration, Linux privilege escalation, web exploitation, and packet analysis.
- Used Nmap, Wireshark, Burp Suite, Metasploit, sqlmap, Bash, Python, Git, and GitHub in repeatable offensive security workflows.
- Practiced infrastructure-focused security concepts including TCP/IP troubleshooting, DNS/HTTP analysis, firewall basics, and monitoring fundamentals.

Achievements

- Ranked **13th out of 82 teams** in TENET CTF 2025 through applied web, Linux, and network security problem-solving.
- Finished as **Runner-Up** in UST GenCys CTF 2025, solving offensive security and practical cybersecurity challenges.
- Ranked **124th among 700 teams** in Escathon CTF 2026, competing in large-scale cybersecurity challenge tracks.

Certifications

- Foundations of Cybersecurity - Coursera
- Cyber Security 101 - TryHackMe
- Deloitte Australia Cyber Job Simulation - Forage
- Jr Penetration Tester - TryHackMe

Education

Dr. D. Y. Patil Institute of Technology **2023–2027**

CGPA: 8.46 / 10

B.E. Artificial Intelligence & Data Science
